DDA desires to create a legacy for the current and future generations by fulfilling their aspirations for active recreational urban green spaces. The goal is to enhance and impart ecological, cultural, educational and recreational services to the society at Global standards.

### Key Intent

1. The Urban Park- Bharat Vandana Park to be combination of landscape architecture, architecture, aesthetics and environmental sensitivity.
2. An iconic and unique design to raise the profile of green spaces as 'Urban Park'
  - Must be both stark and serene,
  - Timeless in simplicity and beauty,
  - Must work with surroundings,
  - Design framework should be open to natural change,
  - Weaving landscape elements with the natural systems,
  - Enhancing the cultural, or environmental resources within the park,
  - Responsive to climatic and seasonal variations.
3. To provide quality and range of services for visitors to and users of the parks for enjoyment, exploration, and healthy living.
4. Affordable and practical solutions for operation, maintenance and support.
